Subject: Plainwell Final INSpection - April 10, 2013

Folks,

Attached is an agenda and discussion materials for the meeting portion of the inspection scheduled for 10 AM next Wednesday at the DNR Plainwell Field Office at 621 N. 10th Street, Plainwell. In addition to reviewing the maintenance work completed at Plainwell over the last 3 plus years, I would also like to briefly discuss the proposal for a modified monitoring program for the Plainwell No. 2 Dam Area for 2013 (the 3rd year following completion of work).

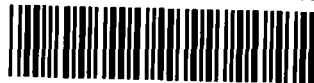

River conditions are currently favorable for the inspection at around 900 cfs at Comstock, but it looks like there may be some rain coming into the area between now and the inspection.

Please forward to others in your organizations who would benefit from these materials.

Regards,

Garry Griffith, P.E.
